

IN: Signal input	NC: no need connect
Working Voltage: 3.3V/5V	Size: 29.4mm*28.8mm

Vibration motor module, it is equipped with a rotor motor. When the signal input is high, the motor will rotate(module will vibrates). When the input signal is low, the motor will stop rotate(the vibration stops).

We can also control the intensity of the vibration through the PWM signal.
